- Member of the Institution of Engineers Australia
(MIEAust)

Fabian has previously worked as a Mechanical Design Engineer in the Manufacturing and Product Development Industries. Fabian has extensive experience in Research and Development, Project Management, Product Design and Testing, Product Validation and Troubleshooting. Fabian also has extensive experience in athletics and human movement applications, as well as four years of academic study in Sport Science, which since 2022 at InterSafe has been extended to the sphere of Occupational Health and Safety, Incident Investigation and Risk Management.

Fabian's work at InterSafe has involved:

- Investigating incidents and preparing expert reports for the legal profession
- Conducting major equipment damage investigations for national and international companies
- Auditing sites, projects, high-risk activities and risk management systems within the construction and mining industries
- Analysing industry and organisational incident data for the mining and construction industries
- Carrying out slips tests on various objects and surfaces

InterSafe has worked with various multinational, national and local organisations in the public and private sector in industries such as Mining, Construction, Manufacturing, Utilities, Accommodation and Food Services, Agriculture, and Health Care, to name a few.

Who is InterSafe?

InterSafe specialises in incident investigation to Engineer Safer Workplace Solutions. InterSafe has assisted our clients in effectively controlling the future through preparation of more than 10,000 comprehensive incident reports (dealing mostly with fatal/permanently disabling occurrences) throughout 60 years of collective experience.

This experience has led to a unique way of thinking about, investigating and preventing incidents. InterSafe shares these powerful and effective investigation models and techniques through a range of courses and services.
